

QUICK REFERENCE GUIDE

DANGEROUS GOODS

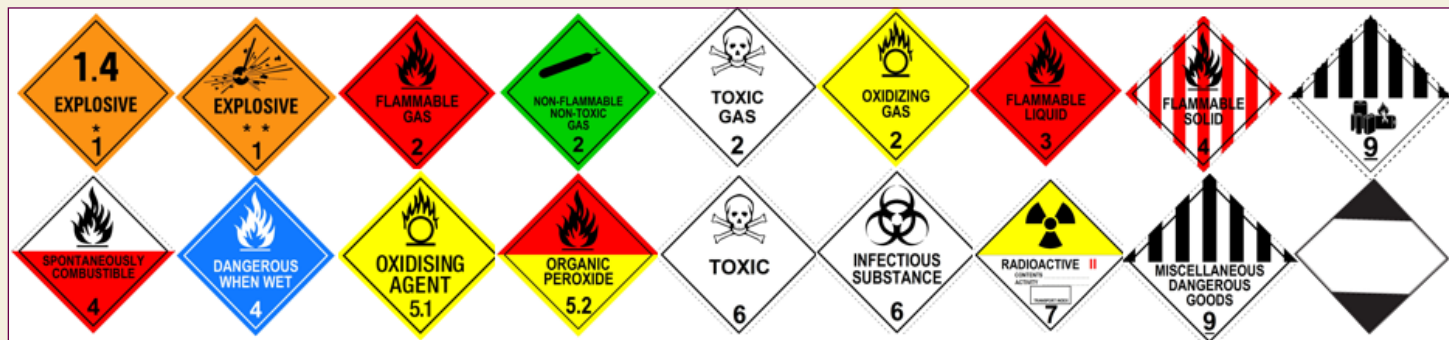

What are Dangerous Goods and Why can't they be consigned using this service?

Dangerous Goods are substances or articles that can cause an immediate hazard when not managed, transported, or handled properly due to incorrectly packaging, declaring, and labelling/ marking items in accordance with the dangerous goods transport regulations and codes applicable to their mode of transport.

They can cause risks to life, health, environment, and properties, due to:

- Explosion
- Fire
- Toxicity
- Spontaneous combustion
- Oxidisation
- Water reactivity
- Corrosive effect

SOME CLASSIFICATIONS FOR DANGEROUS GOODS

HIDDEN DANGEROUS GOODS

Some commonly used household items may contain dangerous goods. An indication can often be a coloured hazard 'diamond' displayed on the item or packaging and they may include:

Examples	Description
Artist Supplies	Oil based paints, paint thinners etc.
Athletic Equipment	CO2 cartridges, ammunition, self-inflatable lifejackets, avalanche rescue backpack, batteries (Cameras, go-pro), etc.
Automotive/Car Parts	Lead Acid Batteries, airbag modules, petrol, etc.
Luggage/Baggage	May contain lithium batteries e.g., a power bank to recharge devices, etc.
Battery Powered Equipment, children's toys	Lithium batteries, unprotected battery terminals, lithium ion and lithium metal batteries, etc.
Camping/Expeditionary Equipment	Flammable liquid (fuel), flammable gas cartridges/cylinder, fire starters, flares, emergency locator beacons, matches, hexamine etc.

Examples	Description
Cosmetics and Perfumery Products	Nail Polish, Aerosol Deodorants, Perfumes, Nail Polish Remover, etc.
Computer equipment	Laptops and Mobile Phones, etc.
Diving Equipment	High intensity diving lamps, compressed oxygen cylinders, shark repellents, batteries in self-propelling equipment etc.
Electrical Equipment	Magnetised material, mercury in switches, etc.
First Aid and Chemical Kits	May contain Liquid Nitrogen, Mercury thermometer, heat producing articles, defibrillators containing lithium batteries, etc.
Gardening Equipment	Lithium batteries in lawn mowers, leaf blowers, hedge trimmers, etc.
Household Items	Flammable cleaning products, corrosive oven/drain cleaner, fly spray, aerosols, pool chlorine, cooktop lighters, lighters refills, book matches, safety matches, CO2 cartridges e.g. soda stream cartridges, paint weed killer, fertilizer, pesticides etc.
Medical Supplies and Sanitisers	Flammable liquids (Formaldehyde, ethanol) containing specimens/samples, thermometer, dry ice, etc.
Mercury Instruments	Barometers, thermometers, monometers, switches.
Party Supplies	Sparklers, party poppers, fireworks, etc.
Petrol Powered Equipment	Chainsaws, leaf blowers, whipper snippers, power generators, small combustion engines, etc.
Perishable Produce	Dry ice
Photographic Supplies	Ammonium hydroxide, lithium batteries, cadmium bromide, potassium ferricyanide, etc.
Repair Kits	Adhesives, organic peroxides, solvents, flammable liquids, oil-based paint, resin catalyst etc.
Toolboxes	Explosive cartridges e.g. power nails or rivets, lithium batteries, compressed gases or aerosols, butane gas cartridges, adhesives, corrosives, paint etc.

NOTE: THIS IS NOT AN EXHAUSTIVE LIST

QUESTIONS
